Public Technical Reports Corporate Source

The Corporate Source Authority System (CSAS) lists all organizations that have contributed information to any of DTIC's three major databases. Each organization is assigned a 6-digit Source Code used to search these databases for information authored or sponsored by the organization. Each Corporate Author record displays the root (highest) element of the organization, the parent (next higher) element of the organization, any sub-organizations or former names, and the organization's Source Code.

Enter part of a Company or Agency name:

In January 2009, President Obama's first executive action was to sign the [Memorandum on Transparency and Open Government](#), which bridges the gap between the American people and their government.

Since its inception 65 years ago, DTIC has provided Americans with a broad range of scientific, technical, engineering and business related resources for academic research. This page serves to enhance our efforts to improve the exchange of public information by providing easy access to scientific and technical (S&T) resources as well as budgetary, social science, policy, and other multidisciplinary resources available in the DTIC collection and through the DTIC Online integrated search.
