Call for a Grey Literature Publisher Commons

A Grey Literature Publisher Commons would provide a point of access for publishers diverse in scale as well as in subject areas. This would ensure the discoverability and visibility of their publications both in textual and non-textual formats. A Grey Literature Publisher Commons would create and support a collaborative environment in which shared experience and expertise could be readily tapped. GreyNet seeks to explore the viability of such an initiative within its community of practice. info@greynet.org.
