

Next year marks GreyNet's 35th Anniversary working with diverse and multiple stakeholders worldwide in the advance of grey literature. By way of research, publication, open access, education, and promotion this field of information is enabled to demonstrate its value for science and society. In 2027, GreyNet International seeks to call together stakeholders in its community of practice for an onsite event and now looks to secure a host organization. Please contact info@greynet.org

Grey Literature Survey 2026

GreyNet's Annual Survey closes on October 1st 2026

- ☐ Which area currently demonstrates the greatest strength of your organization?
- ☐ Which area is most needed to strengthen the position of your organization?
- ☐ In which area do you work mainly within your organization?
- ☐ In which area would you be more of an asset to your organization?
- ☐ In the foreseeable future, what would enable your organization to strengthen its role in research?
- ☐ In the foreseeable future, what would enable your organization to further develop its production/publication capability?
- ☐ In the foreseeable future, what would enable your organization to enhance its collection development?
- ☐ In the foreseeable future, what would enable your organization to further develop its user services?
- ☐ In the foreseeable future, what would enable your organization to more effectively employ AI in the work environment?

Thanks for responding to this questionnaire!

Strategic Standards Information Service Database Launched

The Strategic Standards Information Service (SSIS) database managed by NIST is a unique government-only repository for critical and emerging technology (CET) standardization news and pre-standardization information. It provides federal government stakeholders with a centralized platform to move from reactive tracking to proactive, data-driven influence.
